 \succ Important! Please see the back of this page for planning notes. \prec

This planning sheet should be used only as a **guide** for course planning and it should be used in conjunction with the Bachelor of Science Degree Planner. Remember: not all courses listed are offered each year and course offerings are subject to change. In the event of a discrepancy between the information presented on this sheet and that available on myStudentSystem, the information on myStudentSystem will be considered accurate.

IMPORTANT PLANNING NOTES

- PSYC 104, PSYC 105, BIOL 107, BIOL 108, and STAT 151 can be used to satisfy core requirements in the Bachelor of Science degree.
- 2. Students are required to consult with the MacEwan University Academic Calendar to ensure they meet the prerequisites for all Psychology courses they enrol in.
- 3. Students may take any of PSYC 405, PSYC 406, PSYC 423, PSYC 449, PSYC 467, PSYC 496 and PSYC 498 for credit a maximum of two times, as long as the course topic is different each time they take it.

DECLARATION PROCESS

The Science Psychology major is a competitive major. Students must complete PSYC 104, PSYC 105, and one 200-level PSYC course, not including PSYC 212. Students must also be finished or enrolled in PSYC 212.

The number of new seats available in the Science Psychology major will be determined by the Psychology department annually. Students will submit their declaration by the Winter term add/drop deadline (the second Friday in January). Students who apply will be ranked by their admissions GPA, which is calculated using their most recent 24 credits of university-level course work, without breaking up a term. The applicants with the highest GPA will be admitted to the program first, until no seats remain. Students will be notified of the success or denial of their application to the Science Psychology major no later than February 1.
